

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
1	06/04/2013	S.S. Woodburn	9m	5c	Mel	CH	First dive of the year after launching the boat. Blue sky and flat calm so
2					Don		we went to the Woodburn for a shake down dive. Viz was about 5m. The
3					Mike		wreck now needs a new picture as the winter storms have rearranged it.
4					Helen		The boiler is now broken open with the front peeled off and the fire boxes
5					Chris		and assorted pipes now vertical. Some small brass items have been
6					Derek		revealed. Cold with ice on water in harbour. Amanda came out for the ride
7	25/04/2013	S.S. Woodburn	11.2m	7c	Chris	CH	A murky rainy start but the viz was a reasonable 4/5metres. Another
8					Helen		shake down dive to get back in the swing of things. Helen did some of
9					Derek		sports diver practical work. Got a good look at the new configuration of
10					Mike		the wreck ready for a new picture. No fish around yet as water still cold.
11	26/04/2013	Cairn Head	19m	7c	Chris	CH	Glyn cox. Strong westerlies but calm on lee shore. Drifted to Carrickaboys
12					Mel		and found signs of scallops returning to this once good patch. Still cold
13	27/04/2013	Devil's Bridge	9.9m	7c	Chris	CH	Fullest boat we have seen in some time with nine of us in total. These were
14					John P		very much shake down dives for most on board and we had a number of
15					Mike		set backs from a blown o ring, dropped (and recovered) weight belt, ear and
16					Helen		cold problems, faulty kit, hail stones! and missing the slack because of
17					Russell		a delayed start and slow kitting up. But that is what these early dives are
18					Paul		for. The seals were still at Devil's Bridge but kept out of range underwater.
19		S.S. Woodburn	10.9m	7c	Russell		Viz was only 4m and the current picked up well before we expected it, but
20					Paul		this was a very big spring tide. Still not many fish around but saw a
21					Mike		sluggish butterfish on the Woodburn to add to the long spined scorpion
22					John P		fish I saw a couple of days ago. Did some SMB practice with John.
23					Chris		Amanda tried out her new suit snorkelling
24	30/04/2013	Devil's Bridge	10m	8c	Chris	CH	Derek cox. Went for a tour of all the canyons and gullies since this was a
25					John P		new site for the others. Just saw the tail flippers of a seal at end of dive.
26					Freya		The current was beginning to pick up 1 hr before stated HW. Freya too
27					Russell		cold for 2nd dive with problems with fingers. Again went for tour of new
28		S.S. Woodburn	11.2m	8c	Chris		layout of wreckage for russ and showed him cave where water was a
29					John P		degree colder but clear. Did training with John while Russ rumaged around
30					Russell		and came up with some treasure! He was delighted.
31	04/05/2013	Andy's Patch South	21.2m	8c	Mick (V)	CH	Despite a strongish SW blowing the sea was not too bad and we decided
32					Andy (V)		to try Luce Bay. We motored up to Andy's Patch where 3hrs before LW
33					Russell		there was little current and good viz of 6/7m. We managed to get a good
34					Don		haul of scallops and it was interesting to see that most of the sea life was
35					Mel		still dormant because of the cold temp. Mel had a bad flood in his suit
36					Derek		and Andy and Don got cold.
37					Chris		
38					John P		
39		S.S. Woodburn	6.3m	8c	Mick (V)		Practised more skills with John. Viz not good 2/3m and right on LW
40					Russell		there was a current moving N on the site. While we were down there was
41					Chris		a pan pan call on the radio for a boat that had run aground at the Isle.
42					John P		By the time we got there it had refloated.
43	05/05/2013	Cairn Head	13.4m	8c	Mick (V)	CH	Marginal conditions with a 16mph SSW veering S. Found shelter at Cairn
44					Andy (V)		Head. 3.5 hrs before LW on neap tide virtually no current. Viz about 3/4m
45					Don		Lots of interesting sea life but most very dormant. Rescued a big old
46					Chris		lobster from a detached pot which we found wedged in a cave. It was very
47					John P		sluggish as we watched it ove away.
48		E. Chapel Bay	16.3m	8c	Mick (V)		Another scenic dive just off the Isle sheltering from the strong S wind.
49					Andy (V)		This would be a good nearby site when viz is better. Saw unusual small
50					Don		crab with yellow tufts, hiding on a hedgehog sponge. Practised rescue
51					Chris		skills with John with a planned tow to boat. But surfaced right next to boat
52					John P		John now signed off as a sports diver.
53	16/05/2013	S.S. Riverside	26.2m	8c	Chris	CH	Derek cox. Bouy still attached. Good 5m viz. Got video footage in just
54					Russell		ambient light. Surprised a seal at the front of the wreck
55	17/05/2013	Great Ouse	27.7m	9c	Russell	CH	Derek cox. Quick passage out but we were a little late. By the time the
56					Don		last group were in the tide had turned. Water seemed clear on surface but
57					Chris		held a lot of fleck which made it dark on the bottom but still torch not
58					Mike		needed. Not well shotted, must drop it on the mark. Lots of big berried
59					Helen		lobsters and fish life. Tried out video camera but did not work on wreck!

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
60	19/05/2013	Great Ouse	25m	9c	Phil	CH	Derek cox. Perfect flat calm weather and a speedy trip out to the Ouse.
61					Don		Viz 7/8m. Went in just on the end of the ebb but a long slack on this tide.
62					Chris		Some big wrasse, crabs and lobsters but not the large shoals of pollack
63					Helen		Plenty of smaller fish sheltering in wreckage. Came up to sun and a sea
64		S.S. Woodburn	7.5m		Chris		like a mirror so took some photos of boat for home web page. Cox, four
65					Helen		divers and perfect conditions on LW took 2 cans fuel. Did training with
66					Debi		Helen and this was a shake down dive for Debi. S03,S04
67	02/06/2013	S.S. Riverside (LW)	22m	10c	Mel	PB	Mel had problems with dry suit inflation and ended dive early
68					Russell		
69					Don		
70		E. Chapel Bay	12m		Brian	MS	
71					Alison		
72		Shore nr. Woodburn	3m	10c	Phil		Amanda's first open water dive. Big leak from loose neck seal but as water
73					Amanda		now warmer this was not a big problem. OD1
74	08/06/2013	Yellow bouy PW	20m	11c	John N	DK	Barren sandy sea bed only saw one starfish!
75					Callum		
76		Port William Beach	6.8m		Jim G	PB	Daniel's first open water dive
77					Daniel		He needs to get his weighting better as too light at end of dive. OD1
78			5m		Phil		Dive went well but Amanda still getting bad leak from neck seal. OD2
79					Amanda		
80			7m		Mike		
81					Helen		
82			3m		Debi		Debi too light . Had difficulty getting down
83					Mel		
84		N. Port William	12m		John N	DK	Scallop dive near furthest lobster bouys. Viz not good but a fair haul of
85					Mel		scallops found. Mid tide on springs no current
86					Phil		
87	12/06/2013	S.S. Woodburn	10.5m	12c	Mike	CH	Planned to do Woodburn but thought Chile might have better viz. Wrong!
88					Helen		Came back and dived Woodburn with good 5m viz! Mike and Helen had
89					Chris		Good dive and a wet Amanda enjoyed herself. Saw shoal of 20 pollack
90					Amanda		and the wrasse are now about on the wreck. Helen recovered boiler door.
91	16/06/2013	S.S. Ben Veg	41.7m	12c	Chris	CH	Derek cox. Shot landed in front of bow. Large nos of jellyfish in water. Viz
92					Russell		12/15m Toured vessel but messes up video I was taking. Russ enjoyed the
93		S.S. Woodburn	9.2m		Mike		wreck. Lots of big pollack and wrasse and lion's manes with juvenile fish
94					Jim G		sheltering in their tentacles Viz on the Woodburn only 3m. Daniel could
95					Chris		not get down because of ear problems
96	18/06/2013	S.S. Riverside (LW)	22.1m	13c	Chris	CH	Quite murky on the wreck and lots of jelly tentacles on line. Big lobsters
97					Don		on port side and lots of juvenile bib and codling everywhere. Because of
98					Mel		conditions plumose anemones were particularly striking
99		Harbour entrance	10.4m		Chris		Looked for large mooring block for trawlers whose bouy came loose in
100					Mel		gales. No luck but location instructions were vague
101		Devil's Bridge	8.5m		Chris		Excellent dive. Because viz not good focussed on small things and saw
102					Don		lots of small nudibranchs. Plenty of wrasse and dogfish despite seals
103	22/06/2013	Black Carr, St Abbs	24.8m	8c	Paul		Diving on charter boat Pathfinder out of St Abbs. Good 10m viz
104					Callum		Large Cod and Wolf Fish as well as Arctic and Bolocera anemones
105					John N		Site covered in Brittlestars
106		Ti's Tunnel, St Abbs	20.5m	8c	Paul		Tunnel started in 2m and went down to 12m stretching for about 30m
107					Callum		Plenty of filter feeders and velvet crabs on walls. John and Callum saw
108					John N		pale coloured seal (juvenile?) as well as usual Wolf Fish
109	23/06/2013	Wuddy Rocks, St Abbs	22.5m	10c	Paul		Very nice dive among vertical crags covered in Dead Men's Fingers
110					Callum		Again good viz of 10m
111					John N		
112		Weasel Loch, Eyemouth	15.6m	8c	Paul		Water in loch 12c but kelp at 8m with lots of litter and discarded fishing
113					Callum		line. At end of loch hit a cold 8c current and viz dropped to 4m. Saw shoal
114					John N		of pollock and rock full of animal turf at end of dive. Not too good a dive
115	01/07/2013	Dykefoot>Slockenglass	13m	13c	Chris	CH	Derek cox. 4mph winds from W but still managed to dive. Viz only 3m
116					Helen		and moderate current. Sea life still good on this coast though sand banks
117		E Devil's Bridge	6.8m	14c	Chris		have developed. Helen did SMB exercises and rescue exercise at Devil's
118					Helen		Bridge. Sheltered on E side but strong current when we tried to get round
119					Mike		into canyons. Helen led dive on Woodburn in poorish viz. She navigated us
120		S.S. Woodburn	7.6m	13c	Chris		around as we searched for treasure! Happy to sign her off now as a Sports
121					Helen		Diver.

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
122	09/07/2013	S.S. Woodburn	10m	14c	Mike	DF	Mike dive marshal. Derek's first dive since his ear problem: all went well.
123					Helen		Viz only about 4m. Dug up more of anchor chain. Just a few wrasse
124					Mike		around.
125					Derek		
126	12/07/2013	Devil's Bridge	7m	14c	Mike	DF	Mike marshal again. Viz 4m but water warming up now. Usual wrasse
127					Derek		and pollock. Did a tour of the canyons. Current running strongly outside
128					Helen		shelter of rocks and Mel and Helen drifted a little but still in lee of rocks
129					Mel		
130	14/07/2013	S.S. Jasper	17.6m	15c	Chris	PB	Full boat today. Chris and Russell attached new permanent shot to wreck
131					Russell		but a creel line had also permanently tied itself round stern of wreck. Viz
132					John N		4/5m when first on wreck but soon became silted up as more divers came
133					Jim McD		down. The wreck has filled up with more silt in the holds and the swim
134					Phil		through gap is now half what it was last year. Lot of big crabs on the wreck
135					Mel		along with a few large Ballan wrasse. Comfortable without gloves
136		S.S. Woodburn	10.6m		Phil		Again viz quite reasonable at first but soon got kicked up to zero as more
137					Amanda		divers descended and grubbed around. Amanda had a good dry dive in
138					John N		her new suit.
139					Jim McD		
140					Mel		
141					Chris		
142	17/07/2013	MFV Valhalla	33m	15c	Chris	CH	Flat calm sea. Dropped the shot right on the wreck. Viz was only 3m and
143					Mike		it was dark on wreck. Vessel sits upright with starboard side intact. Port
144					Jim G		side has fallen flat with split at bow. Mast has fallen to starboard. Hold
145					Callum		area has winches etc and the square bridge superstructure stands proud
146		S.S. Woodburn	7.4m		Chris		and intact with door to rear and port holes to front. Rear deck covered with
147					Mike		cables with rounded stern. Wreck totally covered in plumose anemones.
148	20/07/2013	Port William beach	6.4m	15c	Chris	CH	Elizabeth's first dive. Viz 4/5m but with fleck in water. Only juvenile fish
149					Elizabeth		around
150	21/07/2013	Slockenglass	14m	16c	Jim G	CH	Building to big spring tides and as expected the viz at both sites was poor,
151					Mike		only 3 metres. So bad that navigating round the Chile was difficult!
152					Derek		
153		S.S. Craignair / Chile	4.5m		Chris		
154					Helen		
155					Derek		
156	27/07/2013	S.S. Jasper	17m	16c	Don	CH	Bouys still on Jasper. Next to no current 1 hour before HW on 7.8m tide
157					Russell		Viz not particularly good at 2/3m
158		S.S. Woodburn	10.5m		Chris		Training dive for Elizabeth. Viz about 3/4 m. Lots of jellyfish around
159					Elizabeth		
160					Don		
161	31/07/2013	S.S. Riverside	22m	16c	Chris	CH	Nice flat calm conditions. Zipped out to the Riverside to dive with Derek
162					David (V)		and his sons. Viz poor (2m) after overnight rain. David's mask came loose
163					Derek		and in fixing it we lost the wreck and aborted dive. Had to recover dropped
164					Gary (V)		weight belt and retrieve strobe. Not a good profile! Derek found strobe we
165		S.S. Woodburn	6.7m	17c	Chris		lost two years ago covered in barnacles. It still worked!
166					Darren (V)		Viz better on Woodburn and had good dive conducting Darren and later
167					David (V)		Amanda around. Weather turned just as we headed for home.
168					Amanda		
169	03/08/2013	S.S. Riverside	26m	17c	Chris	CH	Derek cox. Quite rough when we set off but still ok to dive. Viz on the
170					Andy (V)		wreck was marginably better than previous dive but still not good. Toured
171					Dawn (V)		wreck but on surfacing found wind and sea were picking up. Even
172					Russell		Woodburn was off and viz at Cairn Head looked hopeless. Big swells
173					Jeff (V)		getting back round harbour entrance so decided to call it a day.
174					Sam (V)		Water now getting quite warm
175	04/08/2013	S.S. Jasper	17m	17c	Andy (V)	CH	Chris cox. Weather a lot better than yesterday. Only a slight chop on at the
176					Dawn (V)		Jasper thought the viz on the wreck was poorish. Visitors had a good dive
177					Jeff (V)		John got separated from the other two and lost the wreck so had to
178					Sam (V)		surface alone. Good experience builder
179					Phil		
180					Derek		
181					John P		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
182	04/08/2013	S.S.Woodburn	10m	17c	Andy (V)	CH	Viz much better on the Woodburn, up to 6m, and all had a good dive
183					Dawn (V)		exploring the cave, wreckage and scenic areas
184					Jeff (V)		
185					Sam (V)		
186					Phil		
187					Derek		
188	10/08/2013	S.S.Breda	20.1m		Bert (V)	PB	Viz not too bad on the wreck. An early dive dictated by the slack water
189					Tom (V)		period for the other wrecks. Lots of Queenies hopping about as we cruised
190					Chris		over the decks
191					Helen		
192					Phil		
193					Mike		
194					Russell		
195					Mel		
196					Jim McD		
197					Callum		
198					John N		
199		S.S.Hispania	22.4m	13c	Bert (V)		Better viz on this one. We were the only divers on the wreck. Callum
200					Tom (V)		and John didn't make it because of a first stage failure and a lost fin.
201					Chris		Thankfully both happened before the dive commenced
202					Helen		
203					Phil		
204					Mike		
205					Russell		
206					Mel		
207	11/08/2013	S.S.Shuna	30.7m	13c	Bert (V)	PB	Were first on the wreck and so viz was quite good. Strong current on the
208					Tom (V)		way down but it did keep the wreck clear
209					Chris		
210					Helen		
211					Phil		
212					Mike		
213					Russell		
214					Mel		
215					Jim McD		
216					Callum		
217					John N		
218		S.S.Thesis	31.1m	13c	Chris		Viz very good and it is still possible to swim through the entire length of
219					Phil		the wreck.
220					Bert (V)		
221					Tom (V)		
222					Russell		
223					Mel		
224					Jim McD		
225					Callum		
226					John N		
227	22/08/2013	S.S.Woodburn	11.8m	17c	Chris	CH	Last minute dive as weather reasonable. Viz particularly poor 2m max
228					John P		
229	25/08/2013	Devil's Bridge	10.1m	17c	Mike	CH	Excellent weather but viz not that good because of big spring tides. Had
230					Helen		a good search looking at small macro creatures.
231					Chris		
232					Mike		

NO.	DATE	SITE	MAX DEPTH	TEMP	DIVERS	D/M Cox	NOTES
233	31/08/2013	Cairn Head	16.4m	17c	Chris	CH	Quite a strong westerly wind but flat calm at Cairn Head. Viz much better
234					Don		than previous week at around 7m. Diving at mid tide but no current since
235					Derek		it was a small neap tide. Lots of life on the site with small scallops
236		S.S.Woodburn	6.8m	17c	Mike		returning. They began jumping around as we got close to them
237					Helen		Good dive on the wreck. Recovered anchor chain
238					Russell		
239					Chris		
240	01/09/2013	Cairn Head	16.4m	16c	Russell	CH	Another good dive despite strong wind. Good viz again and lots of
241					John P		critters. Last three drifted SE as current built up 1/2 hr after HW but mid
242			15.7m		Chris		dive current changed and took them NW right back to starting point.
243					Elizabeth		On journey back hit big waves just off the Isle
244			16.9m		Chris		
245					Phil		
246					Derek		
247	14/09/2013	M.F.V. Valhalla	34.9m	16c	Phil	CH	Sea a bit choppy as the wind blew down Wigtown Bay, good neap tides
248					Caspian (V)		and weather. Big slack from 75mins before LW. Turned 20mins before LW
249					Russell		Viz not as good as we hoped, maybe 3.5 m at best. Lots of small codling
250					Mike		and bib on wreck which is intact and leans to port. Big ships's wheel still
251					Chris		in place in wheelhouse. Got a better view for improved picture.
252		Cairn Head	13.2m		Derek		Nice scenic area thought viz not as good as two weeks ago. Numbers
253					Caspian (V)		of small lobsters out in open. No real current 2hrs after LW on Neaps.
254			11.9m		Chris		Elizabeth now better balanced with her new harness but needs about
255					Helen		2 more kilos.
256					Elizabeth		
257	22/09/2013	Cairn Head	17.5	15c	Mike	CH	Viz not too good but sheltered from strong westerlies
258					Derek		
259					Chris		
260					Helen		
261	28/09/2013	Andy's Patch South	21m	15c	Chris	CH	Good scallop dive with 6m viz. Unfortunately lost bag on way up.
262					Derek		
263					Tosh (V)		
264		Blockan Hole >S	11.8		Chris		SE drift right on LW despite being best neap tide of the year. Viz not as
265					Darren (V)		good nearer to shore because of swell
266	04/11/2013	S.S.Woodburn	10.9m	12c	Mike	CH	Pretty murky. Helen did a short dive but Mike and I had a good rummage
267					Helen		The recent rough weather had broken the boiler up further and thrown up
268					Chris		small brass fitments.
269	17/11/2013	Cairn Head	15.5m	11c	Chris	CH	Derek and Glyn coxes. Viz 2.5 to 3m. Had a good gentle dive and tried
270					John P		out new jacket. Quite a lot of small lobsters out in the open. Found a
271					Mike		couple of small scallops which is encouraging. Coming to end of season
272					Helen		as most fish life has gone to deeper water and kelp dying off. Water still
273					Mel		warm but wind afterwards cold.
274	23/11/2013	S.S.Riverside	26.2m	10c	Chris	CH	Flat calm at last. Went to get coal from wreck. Russ unfortunately had
275					Helen		changed his suit inflator and needed different hose. Raised two big blocks
276					Chris		of furnace coal. Lots of lobsters, bib and whiting sheltering in wreck. Viz
277					Derek		about 3m.
278	24/11/2013	S.S.Woodburn	15m	10c	Helen	CH	Flat calm again. This was very much a training day. Derek and Helen
279					Derek		gained experience in diving by themselves, Mike gained DL practice in
280					Mike		taking down a trainee and Amanda and Elizabeth ended the year on a
281					Amanda		a successful dive after the weather enforced lay off. Viz about 3m and
282					Chris		it was twilight when we ended the dives. Some time since we had to use
283					Elizabeth		the boat running lights.
