

NO.	DATE	SITE	DEPT H	TEMP	DIVERS	D/M Cox	NOTES
1	18/03/2021	Garlieston beach	2.6m	7c	Callum	CH	Shake down dive from beach at Garlieston. As part of running engine in I went up to act as boat cover.
2					Ken		Viz virtually nil but a good potential first dive site for beginners as access easy and sandy bottom
3	21/03/2021	Harry's pots		7c	Chris	CH	Went to look for a string of 70 Buckie pots snagged on wreckage. First boat dive of year and despite some
4					Glyn		settled weather viz was barely a meter on bottom and less when we started work on the pots. Need to return
5					Callum		when viz better and systematically recover them. All in big tangled groups on seabed
6		S.S.Woodburn			Glyn		Storms had really moved wreck around. I barely recognised anything. Found a nice brass flange but lots more
7					Callum		on bottom. Everything covered in a thick layer of fine silt. Felt very cold!
8					Chris		
9	29/03/2021	Capernwray	17m	6c	Glyn	GM	
10					Sandy		
11					Annette		
12			17m		Glyn		
13					Sandy		
14					Annette		
15	02/04/1900	Caim Head	16.9m	7c	Chris	CH	Weather nice and sea calm but viz barely a metre. Barry just checked his kit out on boat line but Duncan and
16					Duncan		I pressed on and found better viz in deeper water. Not a lot of life around yet and no sign of scallops
17					Barry		
18	10/04/2021	Capernwray	17m	7c	Glyn	GM	Seemed quite busy but from photos water looked clear
19					Sandy		
20			7m		Annette		
21					Ian		
22			17.1m		Glyn		
23					Sandy		
24					Annette		
25					Ian		
26	13/04/2021	Caim Head	15.4m	8c	Chris	CH	A quick last minute dive to check out water. Viz about 3.5m in deeper water. Again not a lot of movement
27					Lu		as creatures hunkered down in cold water. Lu got some good photos. Felt cold when we got out.
28	17/04/2021	Capernwray	11.6m	8c	Sandy	SB	
29					Annette		
30					Claire(V)		
31			7.6m	9c	Sandy		
32					Annette		
33					Claire(V)		
35	22/04/2021	Port Yerrock	9.6m		Chris	CH	Water still murky but found a sheltered spot. Got a few scallops and found a patch of sea pens that I had never
36	23/04/2021	Slockenglass	15m	9c	Ian	CH	seen before. Also saw tiny octopus. Tried to find John's snagged pot at the wrong Half Tide Rock!
37					Lu		Found slack right on HW. Viz improved but sea life still dormant. Susie did well after such a long gap out of
38					Chris		Water still murky but found a sheltered spot. Got a few scallops and found a patch of sea pens that I had never
39					Susie		
40	24/04/2021	Slockenglass	17.8m	9c	Chris	CH	Again dived at same area. Duncan posted some good video footage
41					Duncan		
42					Kacie		
43	25/04/2021	Stank	16.2m	9c	Lu	CH	Yet again in same area because of wind. Took out Glenys who now wants to join the club.
44					Mel		
45					Chris		
46					Glenys		
47	30/04/2021	Stank	19.7m	9c	Chris	CH	Big tides meant that the viz was not as good as it has been. Despite being early only had a gentle drift up to
48					Lu		Slockenglass.
49					Annette		
50	01/05/2021	Caim Head (boat 1)	16m	9c	Duncan	CH	I skippered one boat and Iain took his out. Did shake down dives for Caroline and Ciara while the others
51					Mel		ventured further out. Viz not brilliant
52					Paul		
53		(boat 2)	10m		Glyn		
54					Caroline		
55			7m		Sandy		
56					Ciara		
57	02/05/2021	Devill's Bridge outer reef	16m	9c	Tosh	CH	Hit the site right on slack and everybody had a good dive with decent viz. Tosh did well to navigate right back to
58					Ian		boat. Annette and Glyn saw our second octopus of the year, a full sized one this time
59					Sandy		
60					Paul		
61					Glyn		A very relaxing dive but we both felt cold. Got a few scallops but not many around at our usual site. Did notice
62					Annette		that sand had built up in areas and this might have influenced thing. Hope field run off has not killed them off
63		Caim Head	17.4m		Chris		again since there were quite a few dead joined shells around
64					Tosh		
65		Dinnans	5m		Glyn		Glyn and Paul recovered John's snagged pot at the correct Half Tide Rock this time!
66					Paul		
67	17/05/2021	SMS Dresden, Scapa	34.5m	32min	Glyn	LDL	On all dives in Scapa, water temperature hovered between 8c and 9c. Hence dive times now in temp column.
68					Duncan	31%	All apart from Mel and Lu, who were on twin sets, dived on appropriate nitrox mixes shown in DM column
69			34.8m	27min	Sandy		Weather good and a calm sea for our first dive. After a good detailed briefing by Emily pointing out
70					Annette		particular things to look for we all dropped on the deeper stern of the vessel and saw the kege anchor in it's
71			33.1m	43min	Mel		mounting. Moving forward we examined the rear 5.9in guns an then went into the officers quarters to see the
72					Lu		bath amongst the wreckage. Just past the salvage damage in the boiler room area lies a huge davit for the
73			36.6m	30min	Chris		steam launch whose small boiler Glyn identified. The deck here and forward is peeling away but the armoured
74					Tosh		bridge with it's eyebrow slots can be seen. A good intro dive to Sacpa but the briefings are what made the dive
75		SMS Karlsruhe, Scapa	25.1m	38min	Glyn	35%	understandable
76					Duncan		similar
77			26m	30min	Sandy		Shallower than the two other cruisers the Karlsruhe was well broken up. We descended midships and explored
78					Annette		bress controll bridge and saw the forward 5.9in guns which instead of being side by side are now on the sea
79			25.5m	37min	Mel		bed. Forward the anchor winches are fully exposed along with their mechanisms. Behind the bridge the holes
80					Lu		where the funnels were can be peered into showing the gratings
81			26.6m	37min	Chris		
82					Tosh		

NO.	DATE	SITE	DEPT H	TEMP	DIVERS	D/M Cox	NOTES
83	18/05/2021	SMS Coln, Scapa	31.1m	27min	Mel	LDL	Descended to mid section on wreck lying on it's stbd side with deck perfectly vertical. Examined armoured bridge
84					Lu	30%	and tried to find centre 5.9in gun hiding in tangle behind bridge. Moved forward to see gun mounts, long since
85			33.6m	36min	Chris		salvaged and anchor capstans. Holes in deck enabled us to see capstan mechanisms and chain locker. Just
86					Tosh		outside capstans were triangular machine gun mounts. At the bow was the shield and the impressed anchor
87			30.9m	27min	Glyn		recess. Ascended following the edge of the gunnel to the pair of pinnace davits where the shot was attached.
88					Annette		Sandy and Duncan lost their bearings and set off aft to examine the stern
89			32.6m	37min	Sandy		
90					Duncan		
91		SMS Konig, Scapa	30m	29min	Mel	30%	Dropped down the shot to look in the salvage hole revealing the turbine remains and the loading hatch at the
92					Lu		bottom of D turret. Just aft was the 14in thick remains of the armoured citadel bulkhead. Forward and over the
93				31min	Chris		side were the ribs, revealed now that the armoured belt had been salvaged. Tosh had to abort the dive
94			29.8m	34min	Sandy		because of a split HP hose and Lu's suit hose became detached wih meant we stirred up the silt as we tried to
95					Duncan		re-attach it.
96			28m	28min	Glyn		
97					Annette		
98	19/05/2021	SMS Kronprinz Wilhelm	35.2m	30min	Glyn	CH	Joined on trip by film crew who took footage of us kitting up and entering water. Duncan did the underwater
99					Duncan	30%	footage for them and so was in the first pair so as to get best viz. We all dived to the stern and went under the
100			35.1m	20min	Sandy		overhang to see the huge D and E 12 inch rear guns. Viz was a good 10m. The E turret guns necessitated a
101					Annette		dive into the void under the stern. The first four then went to the stern to see the rudders before working their
102			35.7m	36min	Chris		way up the hull looking in the salvage holes at what was left of the turbines. Second four saw the guns and
103					Tosh		then went forward to the mast and viewing top where the viz was a good 15m enabling the whole structure
104			34.9m	29min	Lu		to be seen. They then went back along the ship to view the rudders from above before turning to follow the
105					Mel		along the seabed like expanse of the upturned hull.
106		SMS Coln, Scapa	33.8m	26min	Glyn	30%	Some went sightseeing but 3 dived the Coln again to do the forward section which they missed out on the first
107					Duncan		time we dived the wreck.
108					Annette		
109	20/05/2021	SMS Markgraf, Scapa	40.2m	32min	Chris	CH	The deepest of the German wrecks, we all dropped to the stern to see the rudders and Chris went to the sea
110			36.6m		Tosh	28%	bed to look at the port holes. We then swam up along the hull looking into the salvage holes to see the enormous
111			35.8m	23min	Mel		propshafts. This took us to the anchor chain which had wrapped round the hull as she sank and where the
112					Lu		shot line up was attached. Chasing deco Chris and Tosh swam forward and down to the the bow section
113			34.8m	33min	Duncan		before being forced to return to the shot. Again good 10m vizon the wreck
114					Glyn		
115		F2 and Barge, Scapa	16.3m	39min	Chris	36%	A shallower second dive on the WW2 destroyer just off Lyness. Viz a good 12m here. Descended to the barge
116					Tosh		to look at the workshop inside and the anti aircraft guns in the hold. Then followed rope across seabed to the F2
117			16.1m	36min	Mel		More fish around here with Cuckoo and Ballan wrasse as well as a Ling. Examined bow and bow gun as well
118					Lu		as bridge before swimming over a tangled mass to the stern. Passed one separated generator on way to stern
119			15.8m	39min	Duncan		and another off the stbd. side. Followed the rope back to the barge and the shotline
120					Glyn		
121	21/05/2021	SMS Brummer, Scapa	33.5m	33min	Chris	CH	Sea rougher today with a NW creating a swell in the flow. (Would have been worse outside) Descended to
122					Duncan	30%	bow to see bow gun and armoured bridge with brass railings under the peeled off deck. Moved to searchlight
123			31.8m	25min	Glyn		iris on remains of observation top then ascended past centre gun to see mine trolley rails. Crossed over wreck
124					Annette		and returned along seabed on port side to see paravane attachment at bow. Good 12m viz.
125		SS Tabarka, Scapa	14m	52min	Chris	25%	Tried to drop like stones to wreck in strong current. Set off in wrong direction around outside but finally came to
126					Duncan	24%	cente break and went inside over boilers to the calm cavernous interior. Annette did well on what was her first
127			13.2m	40min	Glyn	26%	wreck penetration. Crabbed across gap with strong current to even more cavernous front section. All surfaces
128					Annette	25%	covered with anemones and cup corals and even saw small nudibranch. Hid in interior waiting for tide to turn.
129	26/05/2021	Cairn Head	19.9m	10c	Chris	CH	Didn't expect much after wind and rain but nice dive with 3.5m viz. Strong current so sheltered in gullies.
130					Lu		Fish life a bit more active now. Ken practised boat handling with Richard while we dived
131	29/05/2021	Cairn Head	18m	11c	Callum	CH	Took out lain's boat, 3B marine to give the engines a turn over. Perfect flat calm conditions for a scenic dive
132					Ian		at Cairn Head. Viz was a little better that a few days ago and we hit the site on time so that there was not
133			22.5m		Tosh		too much of a current despite the big spring tides.
134					Lu		
135			19m		Sandy		
136					Annette		
137		S.S.Woodburn	11m		Mel		Went back out for a dive on the Woodburn so that Alfie could get a deepish proper dive. He did well and his
138					Alfie		buoyancy was good. This was the first real dive of the year on the wreck and once again the winter storms
139					Ian		have re-arranged it leaving various new bits exposed while burying familiar bits.
140					Tosh		
141					Lu		
142					Sandy		
143					Annette		
144	30/05/2021	S.S.Jasper	16.4m	11c	Chris	CH	Got the boat off early but by the meet time it was high and dry so had to replan. 3hrs after LW shotted wreck
145					Russ		with strongish but diveable current running to the N that was dying off during dive. Viz barely 3m. The swim
146					Lu		through in the middle section is even more silted up now. Good festoons of mussels on the lines and a lot of
147		S.S.Woodburn	10.7m		Chris		rope and pots on wreck. Returned to Woodburn and recovered a huge log and then recovered some of ropes
148					Russ		on Barnes Rocks. Good exploration of the site but need to do another picture!
149	31/05/2021	Devil's Bridge	10m	12c	Mel	CH	V early start to avoid yesterday's problem but the flat calm and good viz of the day before had been ruined by
150					Lu		a mild SE wind causing an increasingly choppy sea. To pairs got in the water at Devil's Bridge but had to cut
151			5m		Chris		short the dives due to lack of viz and sea surge. Karen bravely tried snorkelling too at what should have been
152					Chris W		a good site. Since we couldn't get back to harbour to moor we went to the only shelter in Port Yerrock Bay
153		Port Yerrock Beetle	5m	12c	Glyn		Here was flat calm and what we have always discounted as a silty dive site provided some good dives. The
154					Annette		shallowish water had not been stirred up and it seemed to be an area for juvenile fish. Lots of tiny plaice.
155			11.9m		Chris		lobsters and masses of various anemones were seen and I managed to collect some scallops on this last day
156					Chris W		of the season. This is a good site when a SE blows and needs more exploration

NO.	DATE	SITE	DEPT H	TEMP	DIVERS	D/M Cox	NOTES
157	05/06/2021	S.S.Jasper	14m	12c	Glyn	GM	Glyn managed dive to Jasper. Viz about 2m. Shot still on wreck and congers at home
158					Paul		
159					Margaret(V)		
160					Sandy		
161					Caroline		
162	06/06/2021	Slockenglass	17m	12c	Glyn	GM	Gentle drift in Luce Bay
163					Russ		
164					Margaret(V)		
165	13/06/2021	Cairn Head	21.9m	13c	Chris	GM	Nice scenic dive to Cairn Head. Glyn and I went deep and found good scallop bed. Good to know that they are still there as we have seen few on previous dives. Viz a good 6m which was surprising. Duncan and Margaret stayed shallower and saw small Skate and good sized crabs and lobsters. Photos on Facebook.
166					Glyn		
167			16m		Duncan		
168					Margaret(V)		went to Woodburn for Glyn to practise lift but shackle on bag broke! I brought up some lead to turn into weights.
169		S.S.Woodburn	10.4m		Chris		Duncan climbed rocks and recovered the rope that was draped over the Barnes, which will make good shot
170					Glyn		
171	18/06/2021	S.S.Woodburn	10.5m	13c	Elizabeth	CH	Shake down dive for Elizabeth and Derek. All went well. Lu and I explored the outer reefs and were pleased to have viz of about 10m. Lots of big fish around
172					Derek		
173			14.9m		Chris		
174					Lu		
175	19/06/2021	ADC 527	34.8m	13c	Chris	CH	Decided to give the landing craft a go as we did not get on it last year. Mid range tides meant that there was quite a run at 1hr before LW and for fear of pulling shot off I went down first to secure it followed by the others. Looked for Andy's pots and saw lots of rope but need to be down on Nitrox 30 to have more time to look. Viz a good 8m but a lot of fleck in water. Plenty of big fish but back end and prop shafts have collapsed and holes opened in middle.
176					Kacie		
177					Callum		
178					Duncan		
179		Port Yerrock	14.9m	14c	Chris		Duncan got good video footage. Escaped just as wind picked up and went to sheltered Port Yerrock. Good second dive in clear water. Lots of small creatures and Kacie and I found two anchors and a mooring slab probably from Mulberry works in WW2. Good patches of scallops in this area but it is silty. Duncan also got a good sighting and photo of a Sea lemon nudibranch.
180					Kacie		
181			12m		Callum		
182					Duncan		
183	26/06/2021	S.S.Shuna, Mull	30.3m	11c	Duncan	CH	A little choppy crossing the Frth of Lorne but as soon as we entered the Sound the skys cleared and the sea was flat calm. Sea a bit chillier here hovering between 11c and 12c. Nice to get back on the Shuna and viz was quite reasonable at about 5 or 6m. Chris and I swam through bridge which is still standing and went down to have a look in the crew quarters in the bow. Then we dropped over the bow which is covered in Yellow Lipped Sea Squirts and Peacock worms to sea bed to look back at wreck towering above us. Then swan up onto the deck and to the stern, looking in the holds as we went. Dropped over stern to see the large prop and rudder before coming back to shot.
184					Lu		
185					Chris		
186					Chris W		
187					Sandy		
188					Annette		
189					Glyn		
190					Kacie		
191					Mel		
192					Tosh		
193		Loch Sunart Wall	21.9m	11c	Duncan		After a short break in Tobornoray we went out to a sheer wall at the entrance to loch Sunart. Kelpy at top of wall but most life at around the 16m level. Good dive for maintaining neutral bouyancy. Wall initially sheer but then we crossed a sandy slope where some saw an octopus and Squat Lobsters. Wall resumed dropping into darkness and we gently finned along passing patches covered in Red Fingers, Peacock Worms, Branched Antenna Hydroids and Sea Loch Anemones.I also noticed isolated Northern Sea Fans and a Red Cushion Star. Quite a lot of Moon Jellyfish and all along the wall were Devonshire Cup Corals but not much in the way of sponges. A very scenic wall with a different mix of creatures to what we get in our local waters.
194					Lu		
195					Chris		
196					Chris W		
197					Sandy		
198					Annette		
199					Glyn		
200					Kacie		
201					Mel		
202					Tosh		
203	27/06/2021	Ard Na Cuile Wall, F. Lorne	25m	11c	Mel	CH	Sea like glass this morning as we headed south to a wall opposite the tip of Kerrera Island. Not as sheer as the wall yesterday but still very scenic. All the kelp in first 10m heavily covered in Kelp Fir and lots of Squat Lobsters in the boulder slope at 20m. Viz a good 6m. At the 25m level the wall became sheer and was covered in Red and Dead Mens Fingers as well as Plumose Anemones. A few more fish around on this dive particularly some large Cuckoo Wrasse
204					Tosh		
205			17m		Sandy		
206					Annette		
207			17m		Glyn		
208					Kacie		
209			30m		Duncan		
210					Lu		
211			25m		Chris W		
212					Chris		
213		S.S.Meldon, Loch Buie	13.9m	11c	Glyn		After a two hour sail down the Firth of Lorne we put in to Loch Buie where the S.S.Meldon lies. We have never dived this wreck before which lies close to shore in around 12m. Had to re shot it as a creel containing a four foot conger had been tied to the bouy. Carefully released the conger and the few crabs in the creel before diving. The wreck is covered in kelp because of the depth but it was a big steamship probably larger than the Shuna. The stern post, rudder and enormous prop are quite scenic and it is easy to navigate as the lower parts of the hullare intact. We followed the prop shaft along the hull noting the thrust bearings but could find no sign of the engine when it stopped. The enormous Glasgow pattern boiler was easily seen ahead of us though so the engine must have been salvaged. Past the boiler there were 7 or 8 vertical posts rising up which may have held the bridge superstructure or were derricks. Finally the bow section was a little away from the rest of the vessel. Good viz because of the sandy sea bed and a large number of 3ft pollock living on the wreck.
214					Kacie		
215					Sandy		
216					Annette		
217					Duncan		
218					Lu		
219					Chris		
220					Chris W		
221					Mel		
222					Tosh		
223	02/07/2021	Screens Rocks	15.9m	15c	Chris	CH	Stbd. engine would not start so just went out to Screens first. Hit it on slack and had excellent viz of possibly 8m Shoals of Pollock of the rocy pinnacles and plenty of assorted wrasse swimming in the gulleys. Lu captured some good photos, (see Facebook page), of various nudibranchs even though her camera flooded. Found an enormous crab which was one of the biggest I have seen in these waters.
224					Lu		
225					Derek		
226					Chris W		
227					Paul		
228					Ian		
229		Port Yerrock	14m	15c	Chris		Moved on to second site at slow speed. Again excellent viz and we finned into the slight current to leave any kicked up silt behind us. Was surprised to see Sea Lemons everywhere and it appeared that they were spawning and laying egg casings. Again lots of good photos of small critters. This rather silty site is proving to be a gem with remains from the Mulberry Harbour tests, and abundance of sea life and it is the only sheltered site from a SE wind
230					Lu		
231					Derek		
232					Chris W		
233					Paul		
234					Ian		

NO.	DATE	SITE	DEPT H	TEMP	DIVERS	D/M Cox	NOTES
235	04/07/2021	Port Yerrock	18.3m	16c	Glyn	CH	Returned to Port Yerrock because of wind and it was a good site for Stephen's first sea dive. Surprisingly no sign
236					Elizabeth		of all the Sea Lemons but we stayed shallow and showed Stephen the variety of sea creatures. Before setting out
237			6m		Chris		checked engine and the fault seems to lie with the fuel pump.
238					Stephen		
239	09/07/2021	Great Ouse	28.3m	14c	Chris	CH	Sea calm so decided to run out to the Ouse. We were diving it over HW on a mid range tide but had to dive in two
240					Paul		waves. Line tangled around my tank as I hooked shot into wreck so waited watching fish for paul who was following
241					Derek		to disentangle me. Viz a good 8m and wreck was teeming with fish and big lobsters and congers. Had to go into
242					Ian		deco to get 30 min dive.
243		Stank	17.5m	15c	Chris		Paul and I tried Stank to try to recover lost shot. Too many weeds though. Swam out over kelp to reefs but met
244					Paul		strong tidal stream and reduced viz. Ended up in a fast drift
245		Morrach Shore	14m		Derek		Found there was a gentle inshore back eddy on this shore despite strong tidal run in opposite direction off shore.
246					Ian		Nice scenic site with lots of big crabs and lobsters
247	10/07/2021	Great Ouse	28.7m	14c	Glyn	CH	Returned to the Ouse in Iain's boat. Worked out slack fell 40mins before HW, so waited on site. Glyn spotted wreck
248					Mel		but still had quite a pull down to it, using up a lot of air. Again good viz and lots of sea life. Saw a seal on surface
249					Chris		but he didn't visit us on wreck. Again returned to Morrach shore. Found a 5m wall below kelp line running along
250					Russ		shore covered in life. We drifted along this slowly moving back towards the Isle. Quite a few nudibranchs and one
251		Morrach Shore	12m	15c	Mel		patch covered in Candy Striped Flatworms. Stephen did well on only his second dive and had better bouyancy.
252					Darren		
253					Chris		
254					Stephen		
255	17/07/2021	S.S.Jasper	13.1m	16c	Chris	CH	Had visitors from Lunesdale club this weekend so sent them to Riverside. I changed shot on wreck and recovered
256					Margaret(V)		a pot for John. Vikki skippered and Robert came to take photos of cliffs. Second dive at Devil's Bridge had good
257		Devil's Bridge	13.8m		Chris		viz of 8m. In Afternoon I skippered Lunesdale boat and took four out to dive the Ouse, others did Cairn Head. Got the
258					Margaret(V)		slack perfectly but rather that sit waiting went to Scares to see birds
259	18/07/2021	S.S.Riverside	21.1m	16c	Chris	CH	Went down to attach shot but too murky for a good dive, so came up and went to Cairn Head. Lovely gentle drift
260		Cairn Head	17.8m		Callum		With lots of small lobsters out and about. Also saw a few Butterfish. Lunesdale divers also at Cairn Head.
261					Ian		We then went to dive at the Morrach. 1.5hrs after LW a mild inshore current to south. Elizabeth and I swam into it
262					Chris		along the edge of the wall. Good 7m viz and lots of fish around. After 30mins went further out and picked up strong
263					Margaret(V)		current which took us back. Other two picked up this current earlier on and did a drift.
264					Elizabeth		On return took Lunesdale boats to the Woodburn for their second dive.
265		Morrach Shore	13m		Chris		
266					Elizabeth		
267					Ian		
268					Margaret(V)		
269	22/07/2021	Screens Rocks	14.8m	17c	Chris	CH	
270					Lu		Woodburn where it was much calmer even out on the outer edge. Lu recovered the beat up lobster pot in the cave
271		S.S.Woodburn	14.3m		Chris		entrance to get another thing ticked off on her Dive leader course.
272					Lu		
273	25/07/2021	Stein Point	9.5m	17c	Duncan	CH	Dropped in to free off one of John's pots which he marked with our recovery buoys. System worked well.
274					Tosh		
275		Cairn Head	14.5m		Shannon		Bevause of big tides tried Cairn Head where Duncan got some good footage of lobsters. Eilidh on her first dive with
276					Ian		us got a flood because of a loose neck seal. Thank goodness water is reasonably warm but she still got chilled.
277					Lu		
278					Tosh		
279					Elizabeth		
280					Duncan		
281					Eilidh		
282		S.S.Craignair / Chile	5.4m		Duncan		Excellent viz on Chile which many had not dived before. Not too much current. More good footage and photos from
283					Lu		Duncan and Lu
284					Tosh		
285					Elizabeth		
286					Ian		
287	01/08/2021	Dykefoot > SE	14.3m	17c	Russ	CH	Adverse winds meant that we could not get out to the planned Riverside so went for a scenic drift in the shelter of
288					Kacie		Luce Bay. Neap tides meant that the drift was possible at this state of tide, but still a fast drift coming up in the choppy
289					Margaret		water around Ducker Rock. Viz was excellent at at least 8m
290					Chris		
291					Frank		
292	02/08/2021	ADC 527	36.6m	17c	Chris	CH	Went with a full boat just ahead of forecast wind. Dived 1.5 hrs before LW on good Neap Tide and had a long slack
293					Tosh		Shot landed near stern and viz had to be about 10m. So many fish was like diving in an aquarium. Toured whole
294					Duncan		wreck with Tosh and found a spare prop stowed in the rear port compartment. Went out from wreck at bow to
295					Lu		inspect a mound but was only rocks not ammo. Returning could see the length of the starboard side rising up 3m
296					Russ		above seabed. Probably best dive of year. Duncan and Lu got good footage and photos, (see Facebook page)
297					Margaret		
298					Derek		
299		Port Yerrock	14.9m	17c	Margaret		Second very scenic dive in Port Yerrock in shelter of Cairn Head. Found biggest lobster I have ever seen in space
300					Derek		under a Mulberry mooring block and another trapped in a large steel cylinder. It had entered and grown inside it.
301					Russ		Broke open the small hole so that it could get out. Lots of Sea lemons around in the area where we were. Again
302					Duncan		excellent viz of around 8m. Recovered anchor and chain for John while tosh and I were waiting.
303					Lu		
304					Chris		
305					Tosh		
306	03/08/2021	S.S.Jasper	14.1m	17c	Margaret	CH	Quick run up to the Jasper. Buoy was just floating which made things easy. Added more to line for HW dives.
307					Barry S		Quite silty on wreck but lots of big Pollock in the hold.
308					Chris		
309		Port Yerrock	14.2m		Margaret		Second dive same as yesterday in Port Yerrock
310					Barry S		

NO.	DATE	SITE	DEPT H	TEMP	DIVERS	D/M Cox	NOTES
311	07/08/2021	Stank	19.2m	17c	Margaret	CH	Tried Cairn Head but nil viz after rains. Hit Luce Bay at HW on mid range tide and found clearer water. No real current
312					Tosh		
313					Darren		
314	13/08/2021	Cairn Head	19.8m	17c	Glyn	CH	Strongish westerlies but went to shelter of Cairn Head. Viz was much better than anticipated at 5m. Lots of
315					Annette		critters around and all had a good dive. Sandy took Caroline in for her final training dive and is happy to pass her
316			16.2m		Sandy		as an Ocean Diver
317					Caroline		
318	19/08/2021	Great Ouse	25.1m	17c	Chris	CH	Took advantage of calm seas to go out to the Ouse but on a spring tide. Just managed to dive it in two waves, and
319					Richard (V)		were treated to a dive in an aquarium. Shoals of fish everywhere and good 8m viz. One of best dives this year
320					Becky (V)		and our visitors saw our diving at its best. On way in encountered a shoal of 30 to 40 dolphins who decided to
321					Glyn		come and play with us, riding the bow wave. Best dolphin encounter I have see here and fortunately we were able
322					Lu		to get footage of it (see facebook page)
323		S.S.Woodburn			Chris		Second dive o Woodburn was a bit tame after this but still good viz and a guided tour of the wreck
324					Richard (V)		
325					Becky (V)		
326					Lu		
327	20/08/2021	Port Yerrock	16m	17c	Glyn	CH	Managed to get out despite SE wind and got some shelter at Port Yerrock. Good viz and we had a nice foraging
328					Richard (V)		dive. Currents dragged us out to the choppy water at Cairn Head which made getting on board a bit hairy. Came
329					Becky (V)		to harbour through an increasingly rough sea. Just got dive in in time
330					Chris		
331					Lu		
332					Ian		
333	22/08/2021	S.S.Riverside	26.5m	17c	Sandy	CH	Tried the Riverside but had to shot it as the buoy could not be found. I found it eventually about 1/2m below surface.
334					Annette		need to go out at low water to add and extension buoy. Viz about 4m but all enjoyed dive and Duncan took some
335					Duncan		good footage as he did on second dive at Slockenglass where viz was better despite spring tides. Annette's
336		Slockenglass	17.8m		Sandy		grandson Callum came with us and drove the boat.
337					Annette		
338					Duncan		
339	23/08/2021	S.S.Jasper	18.2m	17c	Sandy	CH	Full boat and had to change plans from Kelvinside when Stephen turned up unexpectedly. Useful though as it
340					Annette		gave me the chance to do the last two dive exercises with him. Jasper a bit murky with silt kicked up so Stephen
341					Barry S		did well doing exercises sitting on the deck in this. Beautiful day but burning hot as we went back to Slockenglass
342					Jani		Stephen did final exercise leading on a drift dive ( not that difficult as you go where it takes you!) Good viz but
343					Chris		a faster drift than yesterday. Happy to sign him off as an Ocean Diver at end of dive. Vikki volunteered to skipper
344					Stephen		today and did an excellent job in retrieving divers at end of drift
345		Slockenglass	17.1m		Sandy		
346					Annette		
347					Barry S		
348					Jani		
349					Chris		
350					Stephen
