NSS	AC	DIVING OFFICER'S LO		IVES			2022	
NO.	DATE	SITE	DEPT H	TEMP	DIVERS	D/M	NOTES	co
1	15/01/2022	S.S.Woodburn	10.9m	7c	Chris	СН	First dive of year and far choppier that forecast. Went to search for anchor discovered on last dive and hopefully	RL
3					Glyn Barry S		retrieve it. Viz barely half a metre and we fumbled in the murk for 45mins before finding it at end of dive. Must weigh half a ton so need to remove concretion first. Got it buoyed ready for next dive. On board three people were hit	KB
4 5					Jani		by mal de mer and the choppy seas made recovery difficult. Ironicallly the next day the sea was like a millpond!	
	05/03/2022	Slockenglass	14.3m	7c	Callum Chris	СН	Beautiful day and flat calm sea but after recent weather viz was barely half a metre. Plodded round in the murk for	RL
7 8					Lu Glyn		30 mins and saw a solitary crab. Need to wait for a couple of weeks before trying another dive.	DC
9	03/04/2022	Cairn Head	16.5m	8c	Chris	СН	After a settled spell went to see how things had improved. Viz now about 2.5m. Not much fish life as things are still	RL
10 11					Duncan Elizabeth		dormant. Lots of silt settled on kelp which easily kicks up.	-
12	10/04/2022	Port Yerrock	10m	8c	Tosh	СН		RL
13 14			9.5m		Margaret Elizabeth		A half hour dive seems to be more than enough given the cold conditions. Managed to collect the first Scallops of the year and Callum saw a couple of Pipefish. Generally though things still dormant. Last group of divers carried round	
15					Derek		Cairn Head and into very choppy water with 1m+ swells. A slow splashy return to Harbour. New configuration of	
16 17			16.5m		Glyn Mel		boat gives easier kitting up space but repositioned console has resulted in a wetter ride when not on plane. Ladder worked well but still needs some adjustment.	
18					Callum			
19 20	16/04/2022	Port Yerrock	19.7m	9c	Sandy Paul	CH	Another full boat again and a return to Port Yerrock because of the wind.Viz was a little better at about 3m but despite being about 2hrs before HW there was quite current flowing south and around Cairn Head.	RL
21					Chris		Creatures beginning to become more active. Plenty of scallops around	
22					Elizabeth Glyn			-
24					Tosh			
25 26					Lu Annette			
27	18/04/2022	Port Yerrock	20m	9с	Annette	СН	Again returned to Port Yerrock because of wind. Viz not quite as good and again thisbecame a drift dive. Lu got	СН
28 29					Lu Russ		some good critter pictures and recovered some lead weights.  I checked out the Woodburn. Viz was better and the anchor easily found. Need a new picture of this wreck now.	H
30		S S Woodhum	11.0-		Elizabeth		found a nice brass clip.	
31	25/04/2022	S S Woodburn Slockenglass	11.8m 18.6m	9c	Chris Lu	СН	Quick impromptu dive as weather was perfect. Viz had dramatically improved to what could have been 12 - 15m	СН
33					Margaret			
34 35	29/04/2022	Cairn Head	18m	10c	Glyn Lu	LDL	Wind sent us to the shelter of Port Yerrock. Lots of Sea Hares around	LDL
36		S S Woodburn	10m		Chris		I began hammering concretion off the Woodburn Anchor	
37 38	30/04/2022	Cairn Head (DK)		10c	Lu Margaret	LDL	One boat went for fast drift with Lu in charge under Kev's supervision	GM
39					Russ			
40 41		S S Woodburn (HHD)			Kev Mel	СН	Hammerhead went to Woodburn for shake down dives. Caroline did well after a longish gap and has good buoyancy	СН
42					Alfie		Alfie did well but got Ice cream head or sinus pain so got a short dive	
43 44					Chris Caroline			
45	01/05/2022	Port Yerrock >Cairn Head	20.6m	10c	Chris	СН		LDL
46 47					Margaret Mel		way to the Isle of Man! Just shows how complex the tidal streams are.	
48 49			23m		Russ Derek			
					Lu			
50	02/05/2022	S S Jasper	17m	10c	Lu	CH	Buoy still on wreck but we were lucky to get there while it was on surface. Need to go at LW to attach second buoy	LDL
51	02/05/2022	S S Jasper	17m	10c	Margaret	СН	Viz on wreck was a good 6m and current not bad despite spring tides. Turned about 60mins before HW	LDL
	02/05/2022	S S Jasper	17m	100		СН		LDL
51 52 53 54	02/05/2022		17m	10c	Margaret Chris Derek Chris	СН	Viz on wreck was a good 6m and current not bad despite spring tides. Turned about 60mins before HW Two big congers in the engine and lots of juvenile fish in the bow. Need to go back and clear a lot of rope and other rubbish off the wreck. Sili is building up and also needs to be removed.  Dreary weather but took chance to get a dive in. Took John for his first sea dive and he took to it like a fish to water.	CH
51 52 53 54 55 56					Margaret Chris Derek		Viz on wreck was a good 6m and current not bad despite spring tides. Turned about 60mins before HW Two big congers in the engine and lots of juvenile fish in the bow. Need to go back and clear a lot of rope and other nubbish off the wreck. Silt is building up and also needs to be removed	
51 52 53 54 55 56 57					Margaret Chris Derek Chris JohnMcG BarryS Jani		Viz on wreck was a good 6m and current not bad despite spring tides. Turned about 60mins before HW  Two big congers in the engine and lots of juvenile fish in the bow. Need to go back and clear a lot of rope and other rubbish off the wreck. Silt is building up and also needs to be removed  Dreary weather but took chance to get a dive in. Took John for his first sea dive and he took to it like a fish to water.  No problem removing mask unprompted to clear ears and bouyancy good. Viz about 6m and fish a lot more active	
51 52 53 54 55 56					Margaret Chris Derek Chris JohnMcG BarryS Jani Glyn Chris		Viz on wreck was a good 6m and current not bad despite spring tides. Turned about 60mins before HW  Two big congers in the engine and lots of juvenile fish in the bow. Need to go back and clear a lot of rope and other rubbish off the wreck. Silt is building up and also needs to be removed  Dreary weather but took chance to get a dive in. Took John for his first sea dive and he took to it like a fish to water.  No problem removing mask unprompted to clear ears and bouyancy good. Viz about 6m and fish a lot more active now water has warmed. Turned about 60mins before HW Two big congers in the engine and lots of juvenile fish in the bow. Need to go back and clear a lot of rope and other rubbish off the wreck. Slit is building up and also needs to be removed.  Dreary weather but took chance to get a dive in. Took John for his first sea dive and he took to it like a fish to water.  No problem removing mask unprompted to clear ears and bouyancy good. Viz about 6m and fish a lot more active now water has warmed. Barry had to bail on first dive so I took him for a tour of the Woodburn when he had got his breath back.  Tried to get on the Jasper but buoy under water when we arrived neat to HW. Returned to explore the Woodburn Viz very good  Slighty choppier than expected but calm in Port Yerrock. Viz about 4m. John progressing well and quite confident in water.  John 001  John 002  Incresing winds and big tides forced us to go to Port Yerrock.Viz not brilliant at around 3m. Russ and Paul went scalloping while I took Harry in for his first sea dive. Slight problems ear clearing but being on shot line helped. On bottom, Harry's bouyancy was spot on and he seemed comfortable in the water. Coming up was a chore as the handle on my reel snapped and I had to turn it inch by inch. Second dive on Woodburn viz was better and we went for a tour of the site	RL

Sili is building up and also needs to be removed Dreary weather but took chance to get a dive in. Took John for his first sea dive and he took to it like a fish to water. No problem removing mask unprompted to clear ears and bouyancy good. Viz about 6m and fish a lot more active now water has warmed. Barry had to bail on first dive so I took him for a tour of the Woodburn when he had got his breath back.  Tried to get on the Jasper but buoy under water when we arrived neat to HW. Returned to explore the Woodburn Viz very good  Slighty choppier than expected but calm in Port Yerrock. Viz about 4m. John progressing well and quite confident in water.  John 001  John 002  Incresing winds and big tides forced us to go to Port Yerrock. Viz not brilliant at around 3m. Russ and Paul went scalloping while I took Harry in for his first sea dive. Slight problems ear clearing but being on shot line helped. On bottom, Harry's bouyancy was spot on and he seemed comfortable in the water. Coming up was a chore as the handle on my reel snapped and I had to turn it inch by inch. Second dive on Woodburn viz was better and we went for a tour of the site  Harry 001  Weather held off for us for these training sessions at Capers.	RL
