

NSSAC		DIVING OFFICER'S LOG OF DIVES					2024	
NO.	DATE	SITE	DEPT H	TEMP	DIVERS	DM	NOTES	COX
1	20/04/2024	Loch Ronald	3m	9c	Harry	MS	First dives of the year in nil visibility at Three Lochs setting up their water park. Weather was perfect with no wind but moorings were in a bit of a tangle. Long day but we managed it thanks to Harry organising us.	
2					Chris			
3					Mel			
4					Ian			
5					Callum			
6					Alfie			
7					Harry			
8					Chris			
9					Mel			
10					Ian			
11					Harry			
12	22/04/2024	Slockenglass	15m	9c	Lu	CH	First sea dives after Barry's drone footage showed water had cleared. Went to Luce Bay as water likely to be clearer. Harry and I had a good drift over a new sandbank that had appeared. Lot of fish around and viz about 4m.	RL
13					Jen			
14			18m		Chris		Lu and Jen had equipment problems on this shake down dive. Lu lost torch so must return to look for it.	
15					Harry			
16		S.S.Woodburn	10.2m		Chris		Woodburn had been reassorted as expected and while water clear a lot of silt has settled on seabed. Found lead weight which was handy as I was a bit floaty at end of dive	
17					Lu			
18					Harry			
19	24/04/2024	Flying boat slip, Loch Ryan	6m	9c	Chris	LDL	Sea grass survey dive on behalf of Paul Watson Foundation and SCAMP. No grass but found Native Oyster beds.	
20					Lu		Also some big WW2 mooring anchors for flying boats. Viz about 3.5m	
21					Harry			
22					Nevada			
23	26/04/2024	Slockenglass	16.1m	9c	Harry	HC	Viz about 4 to 5m. Finned into current for about 15min then drifted NW with the current. Plenty of yellow hedgehog sponges and a few cat sharks now appearing.	NT
24					Peggy			
25		S.S.Woodburn	11.1m	9c	Harry		Toured round wreck site and dug back chain in search of anchor	
26	28/04/2024	Port Yerrock	18.8m	9c	Harry	HC	Viz only 2 to 3m but lots of things to see. Lots of nudibranchs, young lobsters and saw two pipe fish. Also saw quite a large monk fish.	NT
27					Lu			
28		S.S. Woodburn	11m	9c	Harry		Raised chain on bag and continued digging for anchor. Lifted a tangle of three lobster pots and rope	
29					Lu			
30	04/05/2024	Great Ouse	24.6m	10c	Harry	CH	Arrived early and got a bit impatient so hit the water with quite a current running. My planned dive time would have been right on slack was when we surfaced! Viz a good 6m and the usual big lobsters and congers around. No shoals of pollack big we did see a seal around before we dived	RL
31					Chris			
32					Nevada			
33					Tosh			
34					Russ			
35		Port Yerrock	13m	10c	Mel	GM	Second boat went for shallow shake down dive. Lots of divers around today as Carlisle Club had two boats out on the Kelvinside	GM
36					Alfie			
37					Elizabeth			
38					Mike			
39					Grant			
40	05/05/2024	McGregor's	17.1m	11c	Harry	CH	Tide timings not good this weekend. Quite a strong drift over scenic seabed with 5m viz. Lots of small crabs and lobsters around	RL
41					Neil			
42					Glyn			
43					Russ			
44					Chris			
45					Margaret			
46					Tosh			
47	06/05/2024	Stinking Port	13.1m	10c	Chris	CH	Shallow dive for Grant with gradual descent. Quite silty on kelp. Lu and Harry and clearer water and spotted a small octopus.	RL
48					Grant			
49					Lu			
50					Harry			
51		S.S.Woodburn	11.8m	10c	Chris		A lot of dead weed had washed over the site hiding a lot of the wreckage	
52					Grant			
53					Harry			
54	08/05/2024	Loch Ronald	4m	11c	Chris	MS	Dive to assess what needs to be done. Need to go back as boat not working so could not move inflatables	
55					Mel			
56	12/05/2024	Port Yerrock	19m	11c	Russ	HC	Harry took boat to Port Yerrock because of expected winds and storm which never materialised. Viz a reasonable 4m. First pair went searching for scallops. Lu got some good photos of two octopuses and a large Red Gurnard	NT
57					Derek			
58					Margaret		Harry found a large anchor and chain which must come from Mulberry preparations	
59					Elizabeth			
60					Lu			
61					Harry			
62	17/05/2024	Loch Ronald	4m	12c	Chris	MS	Four hours in the water lifting weights and repositioning floating platforms	
63					Mel			
64	18/05/2024	ADC 527	35.8m	11c	Harry	CH	Went out for a deeper dive with both boats and two new divers ready for a second dive. Late start due to split neck seal, then had to reshot as shot came off wreck. Expected slack did not materialise and Harry and I had to be dropped three times to get to line. Strong pull down but despite lots of fleck at top viz on wreck a good 10m	RL
65					Chris			
66					Mel			
67					Derek		Had a good look round and found spare prop and some treasure. Very enjoyable dive but on surfacing an incident had developed which put our rescue procedures to the test. Thankfully all went well with a happy outcome in the end.	
68					Glyn			
69					Russ			
70	19/05/2024	Slockenglass	16.8m	11c	Chris	CH	First dive for Antoine in a dry suit. Lovely scenic dive with lots of critters around and good slack water with 8m viz	RL
71					Antoine			
72					Margaret			
73					Elizabeth			
74					Harry			
75		S.S.Riverside	21.6m	11c	Harry		After lunch went out to shot and dive the Riverside for first time in a while. Still a strong current despite good neap tides. Crabs had now replaced lobsters along the port gunwhale. Very big conger in engine room area. Left shot on wreck with intention of replacing it next week	
76					Russ			
77					Glyn			
78					Mike			
79					Chris			
80					Elizabeth			
81		S.S.Woodburn	6.1m	12c	Harry		Quick third dive to use up gas. Surface current to North. Harry dekkited to swim through fire tubes. Russ had quite a swim to get back to boat under water after surfacing in current	
82					Russ			
83					Chris			
84	24/05/2024	Mulberry, Rig Bay	12.2m	12c	Chris	LDL	Went out to dive the Riverside and recover shot line. But big currents pulled the new shot under water ending plans.	GM
85					Harry			
86					Mel		Went off to garlieston to have a look at the Mulberry Harbour there which we have never dived before. Water murky at first but all except Mel found. The huge structure which is 7m high and is basically a huge block of concrete.	
87					Lu		With gentle finning viz improved to 3m. Explored the sides then looked at top at 5m. Covered in kelp but with collapsed cranes and superstructure fallen over to North side.	
88					Margaret			
89					Mel			
90		S.S.Woodburn	13m		Harry		Used up gas on Woodburn. Viz here much better at about 6m	
91					Lu			
92					Chris			
93	25/05/2024	Port Yerrock	22.3m	12c	Harry	LDL	All had a good dive here in varying depths. Lots of critters around especially a big stretch of scallops.	CH
94					Margaret		Good place for Brian to do his first UK dive.	
95					Lu			
96			12m		Annette			
97					Tosh			
98			11.2m		Chris			
99					Brian			
100					Harry			

NSSAC		DIVING OFFICER'S LOG OF DIVES						2024
NO.	DATE	SITE	DEPT H	TEMP	DIVERS	DM	NOTES	COX
101	26/05/2024	S.S.Jasper	18m	12c	Neil	NP	Went out to shot the Jasper with permanent line and attach Glyns mussel line. Hit wreck bang on slack and quickly	LDL
102					Harry		shot and tied off with weight sent back to boat. I fed the mussel line down and got it fixed in place. Sadly buoy	
103					Chris		would not reinflate with air hose but was still floating. Viz a good 6m and lots of life on wreck. Big Conger in engine	
104					Tosh		and a nearly dead one in the hold. I picked it up not realising it was still alive. Sadly shot recovered at end of dive	
105					Annette		as we were at cross purposes. Will have to shot again now	
106	02/06/2024	S.S.Riverside	21.1m	12c	Chris	CH	Went out to sort out the shots on the wreck and recover our good line and weight. All successful with line now fixed	CH
107					Lu		to wreck. Lu got some good photos of the nets festooning the wreck which are now covered in filter feeders	
108					Jen			
109		S.S.Woodburn	7.6m	13c	Lu		Viz on Woodburn barely 3m. a big contrast to last week. Ollie's first dive with us. Grant's new mask with ear	
110					Ollie		protectors seemed to work well.	
111					Chris			
112					Brian			
113					Grant			
114					Jen			
115	06/06/2024	Port Yerrock	19m	13c	Ian	HC	Tried for Mulberry but could not find it and viz poor. Decamped to Port Yerrock instead. Big tides and quite blowy	NT
116					Jen			
117					Harry			
118	08/06/2024	Mulberry, Rig Bay	11.5m	13c	Chris	CH	Strong NW winds but went to Mulberry where it was partly sheltered. Tried to anchor but wind kept dragging us	RL
119					Mel		off. Dropped in and found wreckage after a few minutes and tied permanent shot to it. Viz onit about 3m at most	
120					Alfie		but got a goodlook at wreckage. Lots of big mussels on the top superstructure	
121	12/06/2024	Cairn Head	20.8m	13c	Chris	LDL	Batteries flat on DK so had to transfer to Hammerhead. Viz at site was excellent at at least 10m. Large shoals of	RL
122					Lu		pollack around reefs. Nice gentle dive with next to no current. Lu and I got some good footage.	
123					Margaret			
124	14/06/2024	McGregor's	13.9m	13c	Chris	MA	Sea in Wigtown Bay like cold milky tea after bad weather yesterday. Had to go up to McGregor's to find cleanish	RL
125					Margaret		water. Viz about 3m. Had to contend with current and a big swell which built up while we were under water.	
126					Ian		Lots of life around but a long bumpy ride back	
127	15/06/2024	Morrach shore	14.3m	13c	Chris	CH	Initially went to recover some lost pots then to Luce Bay for cleaner water. Tide running however so not suitable for	RL
128		Cairn Head	16.2m		Chris		Grant and Brian so returned to cairn Head. Viz only about 1m but Margaret and I had a nice dive focussing on close	
129					Margaret		up things like on a night dive. Others bailed out after a short dive. At least we hit it at slack water	
130			6m		Grant			
131			12m		Neil			
132					Brian			
133	20/06/2024	Cairn Head	18m	13c	Lu	LDL	Mid week dive organised by Lu. Weather good but Viz only about 4m as still stirred up from previous week. On	RL
134					Margaret		arrival at site we had about 7 dolphins playing around close to boat and hoped to see them under water. Spring tides	
135			20m		Chris		so current picked up mid dive. Only found scallop patch at end of dive.	
136					Glyn			
137			16m		Mike			
138					Elizabeth			
139	23/06/2024	Loch Ken	7.2m	14c	Chris	NP	Search with Nithsdale Inshore Rescue for a missing prosthetic leg. They had new sonar equipment and wanted	
140					Neil		to try it out. Sank a dummy to see what showed up on sonar but it nestled in silt and was hard to find.	
141	26/06/2024	Port Yerrock	10.7m	14c	Chris	CH	Callum's first time skippering the boat after his course last week. Also did short dive to get him properly weighted in	CHd
142					Richard		his new suit.	
143					Glyn		Water a bit on the murky side, but a good shake down dive for Richard too. Tried first for the Riverside but tide	
144					Mike		running too fast for shake down dives	
145					Chris			
146					Callum			
147	29/06/2024	S.S.Woodburn	7.2m	14c	Chris	CH	First seawater dives for new ocean diver trainees. Took both boats so as not to be crowded. Both did well but	NP
148					Chris T		Chris needs to get a suit as we were lucky to get him in Neil's and Rebekah got cold in a wetsuit. Next time we will	DF
149					Glyn		use a drysuit even if a bit too big. Viz was about 4m so not as bad as I expected.	
150					Rebekah			
151		Cairn Head	7.1m		Chris		After dive watched a small pod of Harbour Porpoise feeding and then went to Devil's Bridge to see seals	
152					Rebekah			
153			14m		Margaret			
154					Brian			
155	06/07/2024	S.S.Shuna	30.1m	12c	Chris	MS	Weather is calm for our dives in the Sound of Mull, however wild weather has stirred up the water so viz is not	
156					Glyn		as good as usual. The Shuna was a good first dive. Viz about 4m but plenty of life on wreck. Had a good look in	
157					Harry		the engine room and toured the rest of wreck. The bridge roof has now collapsed so no nice swim through any	
158					Tosh		more. Also anchor chain on port side has snapped leaving anchor and chain on seabed.	
159					Kevin			
160					Annette			
161					Mel			
162					Alfie			
163					Neil			
164					Mark(V)			
165		S.S.Thesis	30.5m	12c	Chris		Not the beautiful wreck it once was but the tangled steel of the bow section is now covered in life and hard to	
166					Glyn		recognise as a ship. The rear hull is similar to what the bow was like with a lattice of ribs covered in filter feeders	
167					Harry		it is still possible to squeeze down the starboard side of the boiler and then down through the hull to the stern at 30m	
168					Tosh		wreck was home to a large shoal of Pollack	
169					Kevin			
170					Annette			
171					Mel			
172					Alfie			
173					Neil			
174					Mark(V)			
175	07/07/2024	Loch Aline Wall	27.6m	12c	Chris	MS	An early start in order to get slack on the Hispania which many of the group had not dived. First dive on the wall	
176					Glyn		at Loch Aline, which was a new one. Very gentle drift on the edge of the drop off at 25m. Viz about 4.5m and a	
177			30m		Harry		bit murky. Seabed covered with Dead Men's Fingers and anemones. As we were going in came right up to a juvenile	
178					Kevin		White Tailed Sea Eagle which sat on a rock just metres from the boat.	
179					Annette			
180			17m		Mel			
181					Alfie			
182					Neil			
183					Mark(V)			
184		S.S.Hispania	23.3m	12c	Chris		Had to wait for the slack on the Hispania and as we were there two ribs came in and tied to the shot so they could	
185					Glyn		get in first. Not the way to do things. As it was the current was strong and they must have bottled it after a very	
186					Harry		short dive as they were not there when we came up. Current was strong and flowing sideways onto the wreck and	
187					Kevin		up over the deck. Viz only about 5m. Went through the wreck then up to the bow and stern and then quickly down to	
188					Annette		see the rudder and prop shaft. The wreck as ever was covered in orange and white Plumose Anemones with	
189					Mel		some large wrasse and pollack around.	
190					Alfie			
191					Neil			
192					Mark(V)			
193	13/07/2024	Great Ouse	23.6m	14c	Russ	CH	Lots of fish as usual and good viz. Good opportunity for our new members to see one of our best wrecks	CH
194					Richard		Timed the slack well for a double wave of divers. Viz about 7m	
195					Margaret			
196					Ollie			
197					Chris			
198					Grant			

NSSAC		DIVING OFFICER'S LOG OF DIVES					2024	
NO.	DATE	SITE	DEPT H	TEMP	DIVERS	DM	NOTES	COX
199	14/07/2024	S.S.Kelvinside	24m	14c	Chris	CH	Went out to the kelvin side since Carlisle Club were visiting the Ouse today. Again viz was good at about 9m	CH
200					Russ		Probably my best dive of the year and got some good video footage. Afterwards went for a quick look at	
201					Margaret		the Big Scare Rock. Lots of seals and very clear water	
202					Ollie			
203					Neil			
204					Elizabeth			
205	21/07/2024	Cairn Head	8m	15c	Chris	CH	Training dive for Jennifer and first dive in a dry suit for Sarah. Viz barely two metres. Lots of critters around	GM
206					Jennifer			
207					Chris			
208					Mel			
209					Sarah			
210	27/07/2024	Port Yerrock	17m	15c	Lu	CH	A confusing day out. Early start to avoid drying out, with plan to dive the Jasper. Realised GPS not in boat box so tried	GM
211					Richard		to find the Riverside buoy. Failed at that so thought Cairnhead, but sea very choppy there and eventually went in at	
212			11.8m		Mel		Port Yerrock. Very silty with barely 2m viz. Alfie had empty tank so swapped with Margaret who had forgotten her	
213					Alfie		fins so couldn't dive. Searched the silty seabed and saw a few sea pens. Lu and Richard saw an octopus but it shot off	
214					Chris		before they could take it's picture!	
215					Brian			
216		Isle Head	19.2m		Chris		On way back dropped in to try to find a lost line of pots but tide was running and didn't come across them	
217					Mel			
218	28/07/2024	Great Ouse	24.1m	15c	Harry	CH	Took both boats out today to dive the Ouse since we had 11 divers. The aim was to recover the shot that Carlisle club	DF
219					Russ		had left on it the previous week. On way out starboard engine on The Darren Kelly said that it was over heating but did	NT
220					Lu		settle down. Not a very big slack window and viz was poorish at about 5m. As usual huge shoals of Pollack and Bib	
221					Barry		Plenty of lobsters and large congers too. Managed to retrieve the shot and bag for Carlisle club. Wind picked up on	
222					Jani		way back in.	
223					Margaret			
224					Elizabeth			
225					Glyn			
226					Brian			
227					Chris			
228					Sarah			
229		S.S.Woodburn	7.6m		Chris		Turned around to take out our two new trainees both of whom did well. Annoyingly the wind was causing quite choppy	NT
230					Jennifer		seas at the wreck site and there was a 1 metre surge when we came out. Viz was poor ar about 3m. There were	
231			8.4m		Margaret		quite a few small spider crabs on the wreck which I have never seen there before	
232					Annabel			
233					Harry			
234	30/07/2024	Andy's Patch	20m	15c	Harry	HC	Quick mid week dive while weather good. Viz at Andy's patch was very good at about 10m. Lots of fish around and Lu	MA
235					Lu		got some good photos. Viz at other site a bit murky due to river out fall. Margaret skippered with me shadowing.	
236			14m		Harry			
237					Lu			
238	31/07/2024	S.S.Ben Veg	41.8m	15c	Chris	CH	Weather and tides perfect for trip to Ben Veg. Sadly Harry's rebreather malfunctioned so Russ and I had to sort the	DF
239					Russ		shot which involved a 6 min search on the seabed having reeled off. On wreck viz had to be about 12m and got some	
240					Glyn		good footage. Crack in hull where boat was rammed has now begun to open up. Lots of Bib on wreck but not many	
241					Mel		pollock. Went into about 10 mins deco but had 100% O2 on shot at 6m which flushed out any nitrogen. Must do this in	
242					Harry		future. Harry only got brief sight of the wreck as he had brief dive on side mount bottle. Slack about 1/2 hr before LW	
243	13/08/2024	Rathlin N Wall Lighthouse	28m	13c	Harry	MS	First dive out of Ballycastle on the North wall at the upside down H245:H299n lighthouse. Viz was good and wall	
244					Glyn		covered in a profusion of cup corals etc. Kelp covered shelf at 13m after which the wall dropping down to 200m.	
245					Tosh		Elizabeth had buoyancy problems. Not the ideal place for this to happen!	
246					Russ			
247					Lu			
248					Margaret			
249					Mel			
250					Alfie			
251					Chris			
252					Elizabeth			
253		H.M.S.Drake	17.5m	13c	Mel		Wind had shifted and sea was very choppy over the wreck. Viz again quite good. Found two of the guns and had	
254					Alfie		a good look at what was left of the wreck	
255					Harry			
256					Glyn			
257					Lu			
258					Chris			
259					Tosh			
260					Russ			
261	14/08/2024	S.S. Lochgarry	33.4m	13c	Chris	MS	Second shot landed on sea bed at 33m off the wreck. (First shot had not been tied off and disappeared below	
262					Lu		waves though was right by the wreck for Harry to bag and recover) This search on the seabed for wreck	
263					Mel		limited dive time and pushed us well into deco. Viz on wreck a good 18m and had a good tour of the wreck getting	
264					Alfie		some good footage	
265					Margaret			
266					Tosh			
267					Glyn			
268					Harry			
269					Russ			
270		Carrick a Rede Bridge	24.4m	13c	Chris		Quite a swell en route to the Rope Bridge. Flood tide swept us along the rock face to the end of the promontory	
271					Lu		and then wanted to drag us out into deeper water. Had to fin hard to get into the calm water of the lee side.	
272					Margaret		Last pair got swept out into deeper water and had to surface. Viz was not as good because of current.	
273					Tosh			
274					Mel			
275					Alfie			
276					Harry			
277					Russ			
278			31m		Glyn			
279					Elizabeth			
280	15/08/2024	H.M.S.Drake	16.1m	13c	Harry	MS	Not much wind but heavy rain. Had a good search around wreck and found more guns and an up turned turret	N31
281					Chris		Viz was surprisingly good at around 10m. Lots of big pollock on the wreck	
282					Lu			
283					Tosh			
284					Glyn			
285					Alfie			
286					Margaret			
287					Russ			
288					Mel			
289					Elizabeth			
290		S.S.Lochgarry	29.8m	13c	Chris		Last of our dives in Rathlin and probably the best. Viz was over 20m and by diving on Nitrox we got a good long	N31
291					Harry		Dive on the wreck. Lots of good footage taken. Harry and I explored the interior of the wreck where the viz was	
292					Mel		exceptional. Some saw gas masks and a grenade lying in the wreck.	
293					Glyn			
294					Alfie			
295					Lu			
296					Tosh			
297					Margaret			
298					Russ			

NSSAC		DIVING OFFICER'S LOG OF DIVES					2024	
NO.	DATE	SITE	DEPT H	TEMP	DIVERS	DM	NOTES	COX
299	24/04/2024	S.S.Riverside	19m	15c	Harry	CH	Took out visitors from Lunesdale despite bad weather. Located the buoy for the Riverside and Harry and Lu went down	CH
300					Lu		but it was too much of a pull on the line as on spring tides. Diverted to Cairn Head where it was calmer out of the wind.	
301		Cairn Head	13m		Jim (V)		Viz not much more than a meter and a half. Visitors enjoyed dive though.	
302					Marie (V)			
303					Dave (V)		Did second dive on the Woodburn. Surprisingly viz here was better. Harry snorkelled to explore caves and returned	
304					Harry		a lot of beach litter	
305		S.S. Woodburn	10m		Jim (V)			
306					Marie (V)			
307					Dave (V)			
308	26/08/2024	Loch Ryan	2.5m	15c	Chris	LDL	Collaboration with CPWF and SCAMP to look for sea grass beds in Loch Ryan. Got the chance to put Athena through	HC
309					Lu		her paces. Found a 3 acre bed on our first dive via chart plotter. Filmed it and got coordinates for it's parameters.	
310					Chris		Searched three more sites in Loch via sounder and dives but no more sea grass beds. Area to SW of Loch had	
311					Lu		rich sea life and lots of nudibranchs. Surprised at how shallow Loch can be as got 0.7m right in middle.	
312					Harry			
313					Harry		Later dived military pier. Sadly Harry's rebreather malfunctioned which limited his dive. Very silty and full of collapsed	
314		Cairnryan Pier	15m		Chris		wreckage but lots of life there. Dragonets, crabs, Spiny Starfish and lots of Crinoids and Plumose Anemones.	
315					Harry			
316	29/08/2024	S.S.Woodburn	9m	16c	Chris	CH	A quick couple of training dives to get Jen signed off. Viz was not much more than a metre but we were able to get all	RL
317					Jen		the skills needed finished off. Harry came to try out his rebreather after changing sensors and found some interesting	
318					Harry		things. A lot of new things have been exposed	
319					Richard			
320					Chris			
321					Jen			
322	30/08/2024	McGregor's	16.2m	16c	Chris	CH	Went to Luce Bay in search of clean water but viz was barely 3m. Resulted in a fast drift which surprised me for Neap	RL
323					Lu		Tides. In afternoon went out to shot the Inkosi. Water did not look promising on surface but below 20m was quite clear.	
324					Harry		Went down to find shot on seabed but fortunately headed in right direction to find side of wreck towering 10m above	
325		S.S.Inkosi	49m		Chris		us. I tied off and Harry bagged the shot but not enough lift to raise it. Probably lost it. Had a little explore to get	
326					Harry		bearings and realised we were tied to collapsed section forward of stern. Deco ended our dive. Viz on wreck about 10m	
327	31/08/2024	McGregor's	22.8m	16c	Harry	CH	Went back to McGregors for another fast drift but flooded masks and suits meant only three of us got a dive. Chris our	RL
328					Chris (V)		visitor had a good dive though. Sea a lot choppier than expected and glad we went out in Iain's boat to give it a spin	
329					Chris		Got to wreck in good time and again took 3B Marine because of sea state. Much calmer in open sea over wreck. Bit	
330		S.S.Inkosi	41.6m		Chris		of a pull down line but slack and clear again on wreck. Slack seemed to kick in about 40 min before LW. First pair	
331					Russ		stayed shallow on gunwhale and went to stern dipping down around rear gun platform. Harry got to seabed to	
332			49.2m		Harry		examine the gun. Excellent dive and wreck covered in anemones. Lots more to explore on this wreck, just a shame	
333					Neil		it is so difficult to get to	
334	04/09/24	Cairn Head	20m	16c	Lu	CH	Quick trip to Cairn Head to give Annette a dive and for Elizabet to practise with her new jacket. Viz not too bad	RL
335					Annette			
336			16.7m		Chris			
337					Elizabeth			
338	07/09/2024	Cairn Head	20m	16c	Lu	CH	Back to Cairn Head with a full boat. Choppier than expected but hit slack bang on. Lu, Annette and Harry saw a	CH
339					Annette		nice octopus and got good photos.	
340					Harry			
341			16m		Barry			
342					Jani			
343			16m		Mel			
344					Glyn			
345		S.S.Woodburn	10m		Lu		Popped in on the Woodburn on the way back in. Marginal conditions as a 1.5m swell was crashing into the rocks.	
346					Harry		Viz here was better than at the previous site	
347					Barry			
348					Mel			
349	08/09/2024	Chapel Port West	8.8m	16c	Chris	CH	I took Rebekah for a shore dive in the harbour as she was only happy in a wet suit. She did well and had good	DF
350					Rebekah		buoyancy. Had to keep down as there was a lot of boat and jet ski traffic above us	
351		Cairn Head	20m		Lu	HC	Boat went to Cairn Head again where Lu and Harry saw 4 different octopi. Boat had to go back out for Woodburn	
352					Harry		as Mike had tank problems	
353		S.S.Woodburn	10m		Harry			
354					Elizabeth			
355					Mike			
356	16/09/2024	Cairn Head	17.1m	16c	Barry	CH	Break in the weather after bad weekend so popped out for a quick dive. Viz was about 5m. Once again there were lots	RL
357					Jani		octopus around. Glyn saw five of them. Never seen so many as we have over the past few dives	
358					Glyn			
359					Chris			
360	18/09/2024	Capernwray	6.2m	17c	Chris	CH	Training dives at Capers to give Elizabeth some extra practice before Egypt trip	
361					Elizabeth			
362			17.9m		Chris
